Evalyze is an operations management platform that uses Artificial Intelligence algorithms to automate and optimize the distribution, prioritization and monitoring of activities, resulting in a productivity increase of more than 30% in all operations implemented. Cloud-based, 100% web and fully customizable, the solution is easy to deploy and scale.

**MAIN BENEFITS**

1. **INCREASED PRODUCTIVITY**
   - **Operational Efficiency**
     Achieved through the automation of tasks and the underlying benefits of real-time monitoring and control, resulting in a greater team commitment.
   - **Resources Allocation Efficiency**
     Measuring idleness levels and Artificial Intelligence algorithms allow to improve the Capacity Planning process, optimizing the number of required operators.
   - **Effectiveness**
     The rigorous control of effectiveness allows to identify gaps and act to improve this metric.

2. **BETTER CUSTOMER SERVICE**
   - **SLA’s Compliance**
     The intelligent engine distributes priority activities without allowing operators to choose them, ensuring SLA’s compliance.
   - **Customer Satisfaction**
     The reduction of errors and nonconformities, the standardization of processes and the suggestion of response for each distributed activity guarantee a better service level, reflected in a greater satisfaction of the final customer.

**WE CAN ALSO INCREASE YOUR OPERATIONS PRODUCTIVITY AND WE CAN EASILY PROVE IT. CONTACT US!**
